Safety Installation

Category: **Safety & PPE** Type: **Handling note** Priority: **Low** 1 labs

Covers these lab items: Safety installations

What it is used for

Handle and maintain installed safety systems to protect people and property.

How to handle

- Inspect safety installations for visible damage, obstruction, and signs of malfunction.
- Do not disable, alter, or bypass safety systems without authorised approval.
- Keep emergency exits, alarms, extinguishers, and protective installations accessible.
- Report defects promptly and arrange inspection or repair by qualified personnel.

Storage

- Keep installation records, inspection logs, and maintenance instructions in a designated location.
- Store spare safety components in labelled, secure conditions according to manufacturer guidance.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
